

E-CTC

THE ONLINE LEARNING TOOL

AN AXALTA COATING SYSTEMS BRAND

E-CTC LEARNING SOFTWARE

THE ESSENTIAL SKILLS FOR EVERY REFINISHER

Every bodyshop manager knows that training refinishers means downtime in the paintshop. At Cromax[®], we've developed a pragmatic training innovation to help maximise productive work time: e-Cromax Training Centre or e-CTC for short.

E-CTC is an interactive, web-based software for refinishers that provides flexibility; it's designed to train refinishers in their own bodyshops, without the need to travel. The program delivers all the essential refinish expertise needed in a fun, dynamic and interactive package with inspiring tutorials and effective learning techniques.

MODULES AT A GLANCE

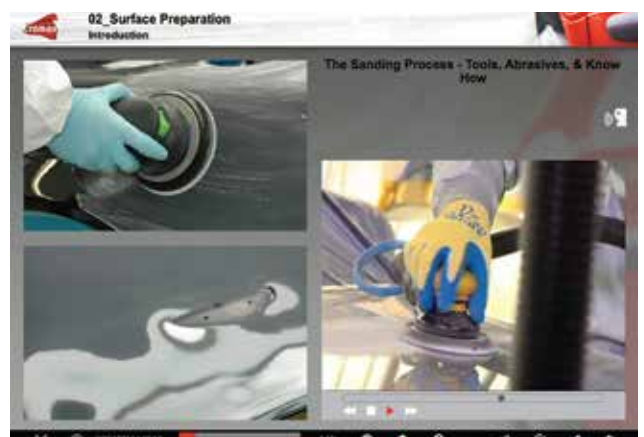

01 SAFETY AT WORK

Refinishers can understand the potential hazards in the bodyshop, how best to avoid and address them.

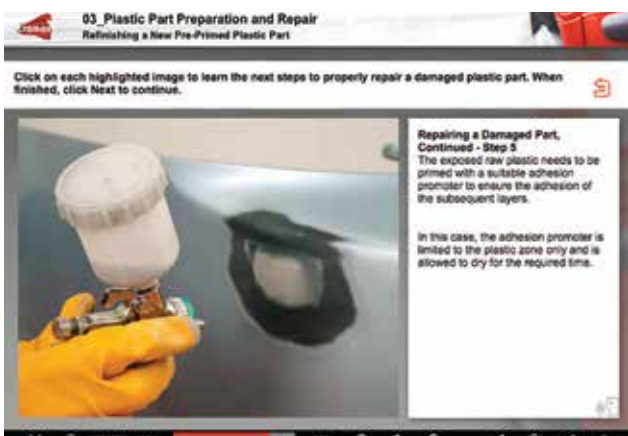

02 SURFACE PREPARATION

Shows refinishers how to prepare vehicle surfaces in the most accurate, effective and productive way.

03 PLASTIC PARTS PREPARATION AND REPAIR

Increasingly used in car manufacturing, plastic components need special treatment. This module details the required preparation and painting methods.

04 HIGH PERFORMANCE SUBSTRATES

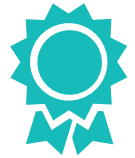

Refinishers discover the correct products and techniques for making high performance substrates shine.

Each module takes about an hour to complete and refinishers can work through them in any order. At the end of each module there is a short test. If participants complete modules one through seven, and achieve a pass rate of 80 per cent or more, they become an e-Certified Cromax® Painter.

After this, the participants will be invited to a hands-on Skills Assessment Day to finalise the e-CTC programme and become a Fully Certified Cromax® Painter.

All modules are available in English, Dutch, French, German, Italian, Polish, Portuguese, Spanish and Swedish.

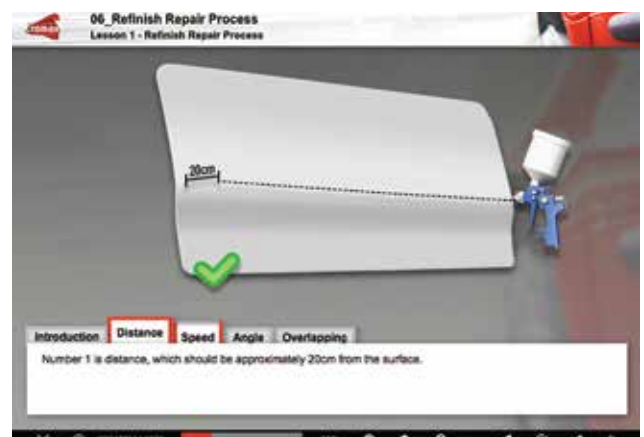

05 COLOURS AND COLOUR TOOLS

Learn how to mix and match colours quickly and accurately with digital colour tools for everyday use.

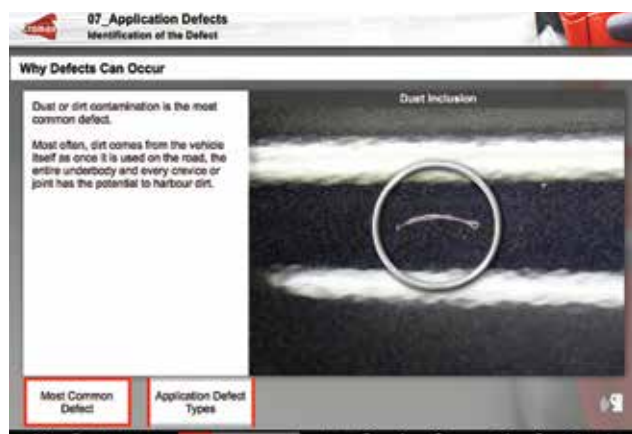

06 REPAIR PROCESSES AND TECHNIQUES

This module helps bodyshops understand the best and most productive techniques that can save time and improve accuracy.

07 RECTIFICATION OF APPLICATION DEFECTS

Experts share tips and tricks for correcting flaws in application.

USER-FRIENDLY, ONLINE TRAINING

No downtime in the bodyshop, productivity is maintained

EXTREMELY FLEXIBLE

Set the training times to fit with workload. Training modules focus on specific skill-sets

ALLOWS FOR MULTIPLE USERS

Improved performance of workers
