

CENTARI® POWER IN PAINT

AN AXALTA COATING SYSTEMS BRAND

CENTARI® SYSTEM

ALL IN ONE VERSATILITY

CENTARI® - THE SIMPLE SOLUTION

Centari® is the versatile solvent-based paint system from Cromax®. With Centari, we've made things simple. Whatever the size of the repair, the type and colour of the vehicle, the application conditions – Centari is all you'll need.

Designed to be labour, cost and time productive, our unique multi-leg mixing system, with interchangeable components is easy to use. It allows you to switch paint quality by just using a different binder in conjunction with the common set of concentrated tints. This makes paint preparation straight forward and economical. It also means you can prepare a wide range of different paint qualities and colours with very little stock investment. With Centari, you're always prepared.

MASTERTINT®

By using one set of common Mastertint® tinters with any binder, versatility is in-built right from the start. There are approximately 75 tinters, including Metallics, Pearls and Xirallics.

SYSTEM HIGHLIGHTS

- One set of Centari Mastertint concentrated tinters
- Variety of binders to deliver basecoat and topcoat solutions
- Outstanding colour performance with the ability to mix up over 200,000 colours in all qualities
- Efficient and easy to use
- Greater range of finish options and colour capability from a smaller range of products
- True **“Value for Money”** automotive paint solution that means you will:
 - **SAVE TIME** in paint preparation
 - **SAVE TIME** in colour specification
 - **SAVE TIME** in inventory control
 - **SAVE TIME** in administration
 - **SAVE STORAGE** space

Greater Productivity - Better System Control - Lower Inventory Costs - Greater Profitability

CENTARI BINDERS

THREE BASECOAT QUALITIES

CENTARI 6000

Use this medium solids, low emission, solventborne basecoat for solid, metallic and pearl colours in clear-over-base applications. We've formulated it to dry quickly, provide excellent coverage and hiding, and made it easy to use. This makes it the economical choice for high quality, efficient refinish jobs.

KEY CHARACTERISTICS

- Great versatility makes it suitable for spot, panel and overall repairs
- Fast drying times mean greater throughput
- Excellent hiding and coverage saves time and materials
- Outstanding mottling control makes for easy application
- Brilliant appearance in clear-over-base systems

CENTARI 600

This effective basecoat is easy to apply, provides good coverage and dries fast. Suitable for spot, panel and overall repairs, as well as custom jobs. Centari 600 can be used for all solid, metallic and pearl clear-over-base applications.

KEY CHARACTERISTICS

- Quick air drying times cut application time
- Good coverage at low film thickness reduces paint consumption
- Outstanding colour performance
- Excellent mottling and perfect flake control make it easy to apply
- A wide application window means it's suitable for spot, panel and overall repairs

CENTARI 610

Centari 610 basecoat is an acrylic basecoat for use in clear-over-base systems for solid, metallic and pearl colours. Suitable for use on cars, trucks, buses and other commercial vehicles.

KEY CHARACTERISTICS

- Excellent mottling and flake control
- Easy to use, dries fast
- Outstanding colour performance
- Ease of application and suitable for colour matching
- Used for spot, panel and overall repair
- Suited for multi-tone striping and design work
- Wide application window

THREE TOPCOAT QUALITIES

CENTARI 5035

This ultra-high solids topcoat is based on patented star polymer technology from the Cromax brand to provide a long lasting, outstanding finish. Its excellent hiding and coverage properties mean you use less material and save time on each job. Centari 5035 is the ideal 2K topcoat for ultimate productivity while meeting existing VOC emission legislation.

KEY CHARACTERISTICS

- Easy to use; minimal application training required
- Fast drying for quicker throughput
- Excellent hiding and coverage to save you time
- Fully VOC compliant
- Suitable for spot, panel and overall repairs

CENTARI 500

A general-purpose industry favourite, this 2K high-gloss topcoat system is ideal for all solid colour applications. It offers outstanding hiding qualities and is quick to dry. Use it for spot, panel or overall repairs for a complete and durable finish.

KEY CHARACTERISTICS

- Excellent durability make it ideal for use on buses, trucks and metal furniture
- Very good hiding properties reduce paint consumption
- Fast drying times
- A wide application window makes it suitable for spot, panel and overall repairs
- Outstanding, high-gloss appearance due its acrylic copolymer base

CENTARI 510

Centari 510 is a 2K economy solid colour direct gloss line that offers excellent gloss and outstanding durability. This two-component topcoat can be used on cars, buses and trucks with a composition based on acrylic copolymer.

KEY CHARACTERISTICS

- Good coverage
- Used over all Cromax 2K cured and sanded primers, sanded OEM finishes, cured and sanded existing paintwork
- Provides a high gloss finish
- Good hiding and average consumption
- Can be used for spot, panel and overall repair
- Can be used on all cured clean and sanded OEM finishes and Cromax primers.

OTHER BINDERS

OTHER QUALITIES

CENTARI 501

A super productive 2K fast dry enamel ideal for use in repair shops with no heat in their booth and require fast air dry turnover.

KEY CHARACTERISTICS

- Fastest dust free time for a 2K Enamel
- Cleaner work and reduced polishing time
- Fast drying, even at low temperatures
- Reduced sensitivity to contamination
- Excellent hardness, unbeatable gloss
- Extended potlife

LUCITE® 400

A 1K acrylic lacquer designed for quick and easy economical repairs without the need for baking.

KEY CHARACTERISTICS

- Solids, metallics and pearls
- Spot, panel or overall repair
- Fast air drying and high gloss retention
- Ease of application and polishability
- Easy to fade out

FOR COMMERCIAL VEHICLES

IMRON® 700

An extremely durable polyurethane enamel designed for trucks, buses, light commercial vehicles and other hard wearing applications.

KEY CHARACTERISTICS

- Remarkable adhesion
- Durable, hard shell finish
- Outstanding chemical resistance
- Fast set up and dry to assemble times
- Easy application and good coverage

All binder qualities shown here are used with one set of common Mastertint tinters.

QUICKER PROCESS TIMES

CENTARI 6000 AND CENTARI 5035

By using Centari 6000 and Centari 5035 binders, in most cases hiding is achieved in one-and-a-half coats with no flash between coats, wet-on-wet application.

Quicker application means less time is spent on each job. Across a month, this can result in substantial time-savings and allow you to schedule in additional jobs. Quicker processing time can also assist in reducing bottle-necks in the spraybooth.

SAVINGS FOR YOUR BUSINESS

Cromax's unique mixing system is capable of handling all your 1K, 2K and clear-over-base applications for solid, pearl, metallic and xirallc finishes. All this is achieved using one common set of Mastertint tinters. Less inventory makes stock management easier and can minimise your overall stock investment.

Further, Centari 6000 and Centari 5035 provide hiding in one-and-a-half coats, driving lower material consumption. This too can provide your business with additional savings.

COLOUR BACK UP

Don't waste time on complicated colour matching processes. Get the perfect colour match every time – and quickly – by using one of the Cromax brand's colour tools. Whether you prefer traditional methods or want the latest automated device, we have the right colour tools to find the correct colour formulation quickly.

01

AQUIRE®

This productive colour retrieval tool – the **Acquire Spectrophotometer** – measures vehicles' paint colour and then selects the formula based on pre-set search criteria entered by the refinisher.

02

CHROMAWEB™

Our latest colour retrieval software is **ChromaWeb**. The ready for use modules will allow you to mix perfectly every time, complete with volume suggestion and complete flexibility. Whether you choose to use traditional or online colour updates, they both bring you quick and easily to the right formula and an excellent colour match.

03

CENTARI FAN DECK

The **Centari Fan Deck** consists of colour chips for passenger car colours. Each chip is sprayed with Centari products to ensure excellent colour accuracy.

THE VALUE IS IN THE SHADE

Developed by Cromax, ValueShade® delivers the optimal undercoat for every topcoat colour.

Our colour retrieval software, Chromaweb will specify the right ValueShade of undercoat to use with your Centari topcoat or basecoat, minimising preparation time. There are seven shades of grey associated with each colour topcoat, ensuring optimal coverage of the undercoat and topcoat in as few coats as possible.

Lower paint consumption and less work time deliver improved productivity and profitability. That's the ValueShade advantage.

MORE THAN JUST PAINT

The productivity gains and cost savings that you can experience by using the Centari MasterTint System are just the beginning.

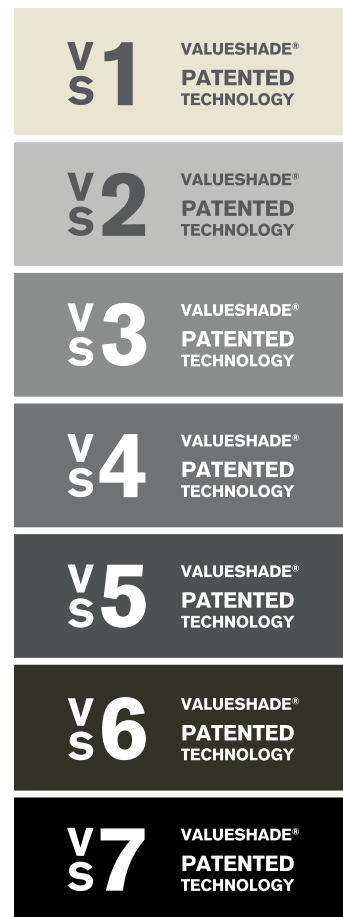

TRAINING

The Centari system is easy to use, although we recommend training to ensure refinishers get the most out of this unique multi-leg mixing system.

Cromax carries out a wide variety of training at the brand's training centres across Australia and New Zealand or on-site at bodyshops. We are committed to help our customers reach new levels of productivity and success.

OUR SUPPORT

If you are looking to drive productivity throughout your business not just in your paint room, then our Business Services Consultants are among the best. With solutions tailored to your business, Cromax can help you realise your full potential.

LOOK GOOD. WORK HARD.
