

PS1504A QUICKFILL PRIMER-SURFACER PRODUCTIVITY IN A SPRAY CAN

AN AXALTA COATING SYSTEMS BRAND

THE NEW PS1504A QUICKFILL PRIMER-SURFACER STANDS FOR HIGH PRODUCTIVITY

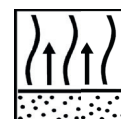

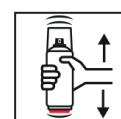

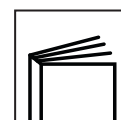

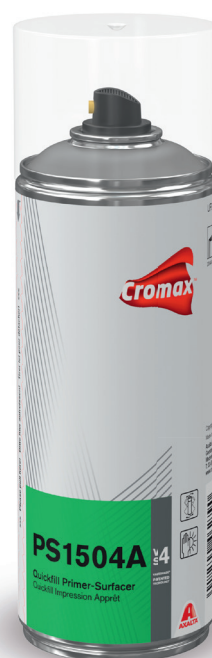

The new PS1504A Quickfill Primer-Surfacer offers improvements in productivity particularly where smaller repairs are concerned. The repair process is shortened considerably thanks to a reduction in process steps, simple universal application, and rapid-drying performance.

The product is designed to enhance fast working processes and can be used directly on bare metal and the most common plastic substrates during a collision repair.

The innovative PS1504A Quickfill Primer-Surfacer helps bodyshops to be more efficient, profitable, and sustainable.

FEATURES:

- 01** Application directly on all metal and common plastic substrates.
- 02** Very good corrosion protection.
- 03** Promotes shorter process times and reduces the number of products needed per repair leading to reduced material consumption.
- 04** Short flash-off and drying times – considerably shorter when compared to existing aerosol primers.
- 05** Easy application thanks to SprayMax technology, very good sprayability and flow.
- 06** High filling power – easy sanding.
- 07** Can be recoated after sanding with both waterborne basecoats as well as solvent-based basecoats and topcoats.
- 08** Excellent adhesion and intercoat adhesion.
