Cromax appoints new EMEA Training and Technical Service Leader

Thomas Cool has been named the new Cromax® Training and Technical Service Leader for the Europe, Middle East and Africa (EMEA) region, as of 1 January 2020. Based out of the Cromax Training Centre (CTC) in Mechelen, Belgium, Cool not only sets the training agenda for the CTC, but also is responsible for the internal training and development of the Cromax trainers who are based at national training centres throughout EMEA.

Cool says, “This is a fantastic role and one which I relish meeting head-on. Tackling the challenges the industry faces is key to our industry’s future and innovation is defining our evolving technology at Cromax, a global premium brand of Axalta, so it has never been more important for refinishers to maintain and to improve their skills so they can continue to offer the most productive repairs.”

Cool has worked for Axalta since 2011, where he started as a technician in the Colour Lab in Mechelen working with colour development and formulations. He moved into refinish research and development, and in 2015 he was appointed Technical Specialist for Cromax in EMEA.

Cool takes over from Koen Silverans, who moves into an Axalta sales role in Belgium after five years of leading the CTC.
