Cromax has signed an agreement with Agoria Solar Team in Belgium to become one of the team's Silver Partners. Under the terms of the agreement, Cromax will supply the paint for the special solar car that a team of young students – the Agoria Solar Team - is designing and building and spray the car at the Mechelen CTC. Besides supplying the paint we will provide technical expertise and guidance for the coating application to the carbon surface resulting in as less weight as possible while keeping a robust result to endure the natural elements. The brand’s logo will appear on the car, which will compete in the 2019 World Solar Challenge - regarded as the world championship for solar vehicles - in October in Australia.
