IMRON FLEET LINE INDUSTRY

THE SOLUTION FOR LIGHT INDUSTRIAL COATING

THE HI-TECH CHOICE FOR OPTIMAL RESULTS

More and more bodyshops include painting of light industrial objects in their services. The requirements for this are varied, ranging from coating different substrates to requests for certain degrees of gloss or effects.

The Imron Fleet Line Industry system for industrial coating can adapt to many applications while using a relatively small number of products.

IMRON FLEET LINE INDUSTRY IS A MODULAR SYSTEM

If you already use the Imron Fleet Line commercial vehicle mixing system, you’ll find it even easier, as the Imron Fleet Line Industry mixing system is based on it. With just a few extra Imron Fleet Line Industry mixing concentrates plus ten binders and the associated activators, you have everything you need to give industrial objects high-quality, value-enhancing coatings.
A PERFECT MATCH FOR MANY
SUBSTRATES
● Steel
● Zinc
● Aluminium
● Coated or pre-coated surfaces, e.g. coil coatings, powder coatings
● Wood
● Mineral substrates, e.g. concrete, roof tiles, floor/wall tiles
● Copper/brass/bronze
● Plastics

A PERFECT MATCH FOR MANY
APPLICATIONS
● Dispensers
● Containers
● Crates
● Steel elements
● Cycles
● Diggers
● Bulldozers
● Electronic accessories
● Tools
● Cabinets
● Shelves
● Ladders
● Letterboxes
● Sunbeds
● Pipes
● Furniture
● Agricultural equipment
● Floors
● …and many more

IMRON FLEET LINE INDUSTRY IS
COMPATIBLE WITH ALL APPLICATION
METHODS
Gravity-feed gun and HVLP, pressure pot, air-mix and airless, electrostatic as well as rolling and brushing.
