CC6700 ULTRA PERFORMANCE ENERGY CLEAR

THE ULTIMATE CLEAR FOR SPEED AND PERFORMANCE

HIGH-SPEED DRYING
Based on a new patented Axalta resin technology, Ultra Performance Energy Clear CC6700 was developed to dry extremely fast. In addition to helping bodyshops improve their productivity, the short drying times of CC6700 also improve bodyshops’ overall energy efficiency.

EXCEPTIONAL APPEARANCE
When it comes to appearance, CC6700 from Cromax provides an exceptional, mirror-like finish with a depth, gloss and hardness that cannot be achieved with standard clearcoats. CC6700 is the only clearcoat that combines a top appearance with such short drying times.

SEE FOR YOURSELF
We’ve captured the speed and top result of our Ultra Performance Energy Clear CC6700 on video. So that you can see its exceptional performance for yourself!
INCREASED PRODUCTIVITY

Ultra Performance Energy Clear CC6700 dries in a record-shattering 5-minute bake at 60°C. In ambient air of 20°C, CC6700 will take between 30 to 60 minutes to dry and can be polished as soon as 90 minutes after application.

Outranking all other clearcoats in drying speed, CC6700 from Cromax is the best choice for bodyshops that want to improve their output while increasing their flexibility.

CHOOSE YOUR ACTIVATOR WISELY

STEP-CHANGE ENERGY EFFICIENCY

Compared to conventional clearcoats, CC6700 from Cromax significantly reduces the energy consumption of a typical paint job. Both in a short bake cycle, as well as in curing at room temperature, Ultra Performance Energy Clear CC6700 sets new benchmarks for sustainable clearcoat application. With its fast, standard and high temperature/high humidity activators AR7701, AR7702 and AR7703, Ultra Performance Energy Clear CC6700 is the ideal package for bodyshops that are serious about energy efficiency.

A LASTING TOP APPEARANCE

Unlike traditional clearcoats, Ultra Performance Energy Clear CC6700 results in a mirror-like finish with an exceptional depth of gloss. Resulting from an excellent through-cure, the top appearance of CC6700 from Cromax is matched by an outstanding hold-out and gloss retention.
VERSATILE APPLICATION, ROBUST RESULTS

As part of our most productive Cromax Pro System, CC6700 lives up to its pedigree by providing robust and versatile performance. Suitable for spot, panel and overall repairs, as well as 1.5 coat application, CC6700 delivers consistent results time and again. The fact that a CC6700 clearcoat can be polished after 90 minutes and has an extremely hard finish after just one day, is proof of its robust character.

Ultra Performance Energy Clear CC6700 delivers an all-round robust performance for bodyshops that are committed to quality.
