

# THE MOST ACCURATE REFERENCE

Fan Decks are traditional colour tools. Consisting of metal colour chips that have been painted with the actual products, Fan Decks provide excellent colour accuracy. Our Fan Decks are conveniently sorted and reinforced with a laminated back to prevent folding and curling.

Retrieving information from the chips is very easy – simply scan the barcode on the reverse of the chip. You can also enter the code manually into our **ColorNet Pro** software.

## INTERESTED IN SAMPLING OUR FAN DECKS?

Our local distributor has the latest information on all Cromax fan decks.
